TABLE OF CONTENTS OF THE BOOK,
"OXIDATION OF METALS AT HIGH TEMPERATURES"

V. I. Arkharov

Page

Introduction. Subject and Scope of Investigation

- | | |
|---|----|
| 1. Significance of Investigating the Oxidation Process in Metals at High Temperatures | 3 |
| 2. Two Directions in Studying the Process of Oxidation | 4 |
| 3. Diffusion Character of the Phenomenon | 5 |
| 4. Effect Produced by the Conditions of Contact of a Scale With Adjacent Media on the Rate of Process | 7 |
| 5. Significance of the Scale as an Intermediate Medium for the Rate of Process | 8 |
| 6. Significance of the Chemical Nature of Oxidizable Metal | 8 |
| 7. Limitation of the Field Under Study and Exact Definition of the Problem of Investigating the Oxidation Process | 9 |
| 8. Elements Which Determine the Structural Picture of the Process | 9 |
| 9. Dual Significance of the Structural Characteristics of Scale | 11 |
| 10. Experimental Means and Methods for Investigation | 12 |
| 11. Specific Difficulties of Investigating the Structure of Scale | 17 |

Chapter I. Preliminary Review of Oxide Phases Which Occur in a Study of Scale

- | | |
|-----------------------------------|----|
| 1. Classification of Oxide Phases | 20 |
| 2. Basic Phases | 21 |
| 3. Oxides of Alloying Elements | 24 |

50X1-HUM

	<u>Page</u>
4. Complex Oxides of Iron and Other Metals With Exact Stechiometric Composition	24
5. Complex Oxides of Iron and Other Metals Without Exact Stechiometric Composition (Solid Solutions)	26
6. Crystal Lattices of Oxide Phases	26
7. Debye Crystallograms of Oxide Phases	34
8. Certain Physicochemical Properties of Oxide Phases	36
9. Phase Diagram of the Iron-Oxygen System. Significance of This Diagram for Investigating the Process of Steel Oxidation	36
 Chapter II. General Characteristic of the Structure of Scale	
1. Division of Metals into Two Types According to the Structure of Their Scale (Pilling-Bedworth Criterion)	39
2. Macrostructure of the Scale on Iron and Steel	40
3. Macrostructure of the Scale on Other Metals	44
4. Chemical Composition of Iron Scale	44
5. Microstructures of Iron Scale	45
6. Phase Composition of Scale According to Data of X-Ray Analysis	47
7. Mechanism of the Oxidation Process (First Approximation)	48
 Chapter III. Structure of the Oxide Films on Metals at Initial Stage of Oxidation	
1. Significance of the Initial Stage of Oxidation for Clari- fying the Mechanism of Process	53
2. X-Ray Investigation of the Early Stages of the Oxidation Process of Iron and Steel	54
3. Limitation of Possibilities for the Method of X-Ray Analysis of Thin Films	59
4. Structure of the Primary Oxide Film on Iron	60
5. Structure of Oxide Films at the Initial Stage of Oxidation at Elevated Temperatures	65
6. Protective Nature of the Phases With Spinal-Type Lattice	66
 Chapter IV. Quantitative Regularities in the Oxidation Process of Metals	
1. Quantitative Relations Among Various Factors of the Oxidation Process as an Image of the Process Mechanism	68
2. Parabolic Time Law of Increase in the Thickness of Scale	69
3. Exponential Temperature Law of Increase in the Thickness of Scale	70
4. Significance of the Electrical Conductivity of Oxide Phases for Studying the Mechanism of Oxidation	72
5. Valensi's Theory	75
6. Smirnov's Theory	78
 Chapter V. Correlation Between the Structure of Scale and the Oxidation Rate of Iron and Steel at High Temperatures	
1. Relation Between the Structure of Scale and the Oxidation Rate of Iron	82
2. Substantiation of Correlation Between the Prevalence of Wues- tite in Scale and the Intensification of Iron Oxidation	84
3. Hypothesis on the Mechanism of the Heat Resistance of Steels	86

50X1-HUM

CONFIDENTIALCONFIDENTIALPage

4. Experimental Verification of the Hypothesis on the Heat-Resistance Mechanism of Steels	86
5. Confirmation of the Hypothesis on the Heat-Resistance Mechanism by the Results of Benard's Works	90
6. Effect of Electrolytical Deposits of Chromium and Nickel on the Oxidizability of Iron at High Temperatures	95
7. Attempts to Establish Correlation Between the Structure of Scale and the Oxidation Rate of Copper	95
8. X-Ray Investigation of the Phase Composition of Cobalt Scale	96
Chapter VI. Nature of Wuestite and Its Significance for the Oxidation Process of Iron and Steel	
1. Composition and Structure of Wuestite	97
2. Phases CoO and NiO	106
3. Precision X-Ray Investigation of Phases FeO, CoO, and NiO in Scale	107
4. Differences in the Nature of FeO Phase and CoO and NiO Phases and Diverse Character of Oxidation of Iron, Cobalt, and Nickel	108
Chapter VII. Nature of the Gamma-Fe ₂ O ₃ Phase	
1. Intermediate Stage in the Process of Conversion (Oxidation) of Magnetite Into Hematite	114
2. Structure of the Gamma-Fe ₂ O ₃ Phase	115
3. Significance of the Gamma-Fe ₂ O ₃ Phase in the Oxidation Process of Iron and Steel	120
Chapter VIII. Orientation Relations Between the Crystal Lattices of Metals and Oxide Phases During Oxidation	
1. Orientation Relations at Oxidation on Crystalline Surfaces	121
2. Orienting Influence of the Crystal Lattice in Phenomena of Gas Adsorption	123
3. Orientation Relations in Phenomena of Chemical Reactions on the Surface of a Solid Body	124
4. Orientation Relations Between the Lattices of Iron and Its Oxides	126
5. Orientation Relations Between the Lattices of Other Metals and Their Oxides	132
6. Regularities Controlling the Orientation Relations	134
7. Significance of Orientation Relations for the Oxidation Process of Metals	134
Chapter IX. Texture in Scale	
1. Definitions	136
2. Two Kinds of Radial Textures Genetically Different	137
3. Presence of Radial Textures in Scale	138
4. Texture in the Exterior Layer of Iron Scale	140
5. Texture in the Middle Layer of Iron Scale	141
6. Texture in the Interior Layer of Iron Scale	144
7. Detailing the Structural Mechanism of the Oxidation Process of Iron on the Basis of Studying Textures in Scale	145
8. Texture in Iron Scale Formed During Oxidation of Iron in Water Vapor	147
9. Textures in the Scale of Cobalt and Nickel	150
10. Investigation of Texture in the Scale of Chromium	153

Chapter X. Structural Picture of the High-Temperature Oxidation Process
 of Iron, Low-Carbon Steel, and Certain Other Metals

- | | |
|--|-----|
| 1. Three Stages of the Oxidation Process of Iron and Steel | 155 |
| 2. Mechanism of Growth of Scale Layers During Oxidation of Iron | 157 |
| 3. Mechanism of Reactive Diffusion in the Process of Oxidation | 159 |
| 4. Peculiarities of the Oxidation Process of Nickel, Cobalt, and Chromium | 163 |
| 5. Effect of Alloying Elements on the Oxidation Process of Iron. Principle of the Heat-Resistance of Steel | 163 |
| 6. Methods of Developing the Composition of Heat-Resistant Alloys | 165 |
